2025 YEAR-END RECAP

## MARKET OVERVIEW

2025 was a good year for Park City single family home sales. 514 homes sold represent a 17% increase over 438 homes sold in 2024, and it was 30% higher than what we saw in 2022 & 2023. Interest rates in 2025 were as high as 7.04% last January and stayed above 6.5% until September. During the last 4 months of the year they averaged around 6.25%, hitting the low for the year of 6.15% at the end of December.

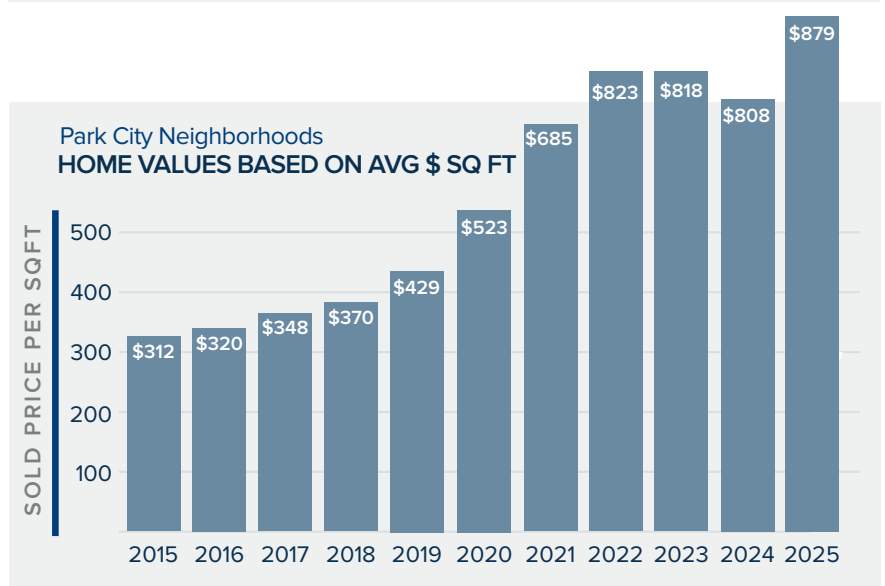

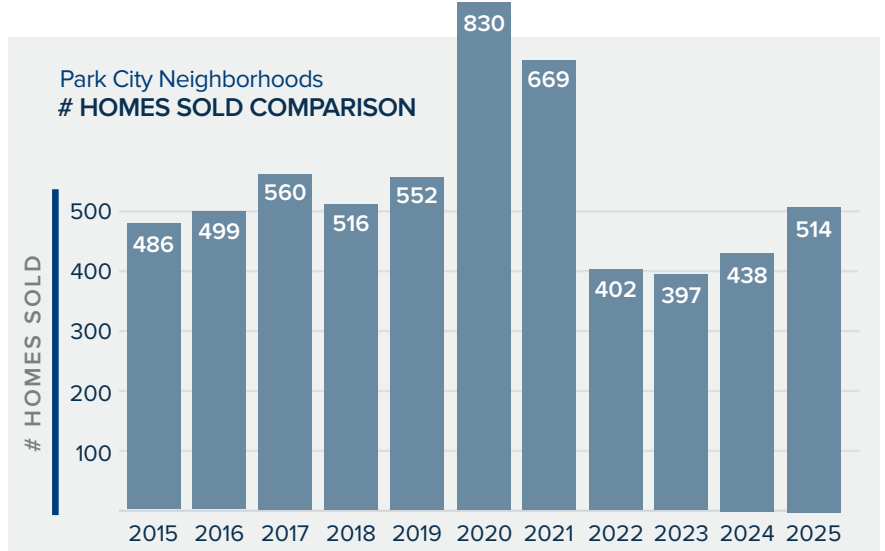

For the first 7 months of 2025 the # of sales per month averaged 36 homes sold, representing an average of more than a 6 month supply. During the last 5 months of the year there was an average of 51 homes sold per month, representing an average of just under a 5 month supply. Since about half of homes sales in Park City are financed, I'll assume that the end of the year uptick in sales correlates with lower interest rates.
