2025 YEAR-END RECAP

MARKET OVERVIEW

2025 was a good year for Park City single family home sales. 514 homes sold represent a 17% increase over 438 homes sold in 2024, and it was 30% higher than what we saw in 2022 & 2023. Interest rates in 2025 were as high as 7.04% last January and stayed above 6.5% until September. During the last 4 months of the year they averaged around 6.25%, hitting the low for the year of 6.15% at the end of December.

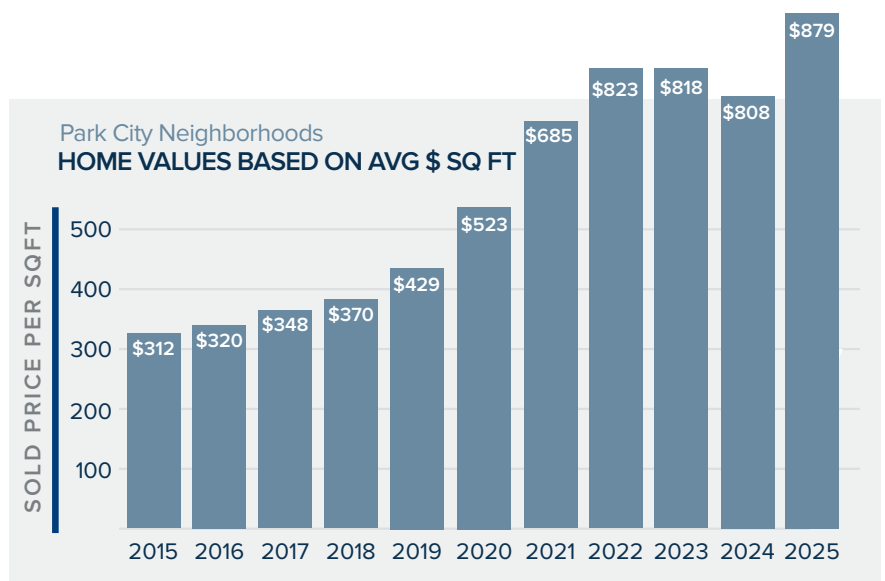

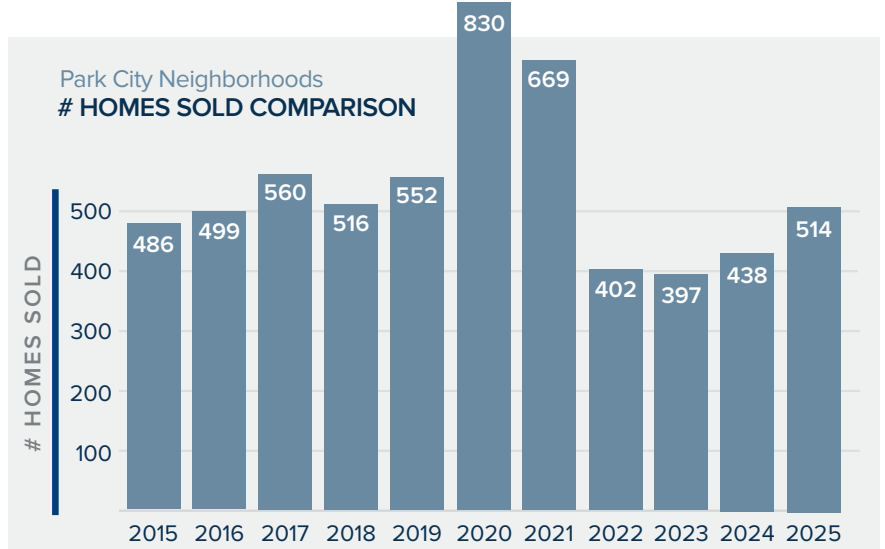

For the first 7 months of 2025 the # of sales per month averaged 36 homes sold, representing an average of more than a 6 month supply. During the last 5 months of the year there was an average of 51 homes sold per month, representing an average of just under a 5 month supply. Since about half of homes sales in Park City are financed, I'll assume that the end of the year uptick in sales correlates with lower interest rates.

PROSPECTOR UPDATE

Prospector ended 2025 with 6 homes currently for sale. Three of those are new construction in PC Heights. There were 17 homes sold on 2025, which is about 5 more than each of the last 4 years. Three of the homes sold were located on the Rail Trail, which is a treasured in-town location. The average sold \$\$ per sq ft was up 8% over 2024, which is similar to the overall market.
