2025 YEAR-END RECAP

MARKET OVERVIEW

2025 was a good year for Park City single family home sales. 514 homes sold represent a 17% increase over 438 homes sold in 2024, and it was 30% higher than what we saw in 2022 & 2023. Interest rates in 2025 were as high as 7.04% last January and stayed above 6.5% until September. During the last 4 months of the year they averaged around 6.25%, hitting the low for the year of 6.15% at the end of December.

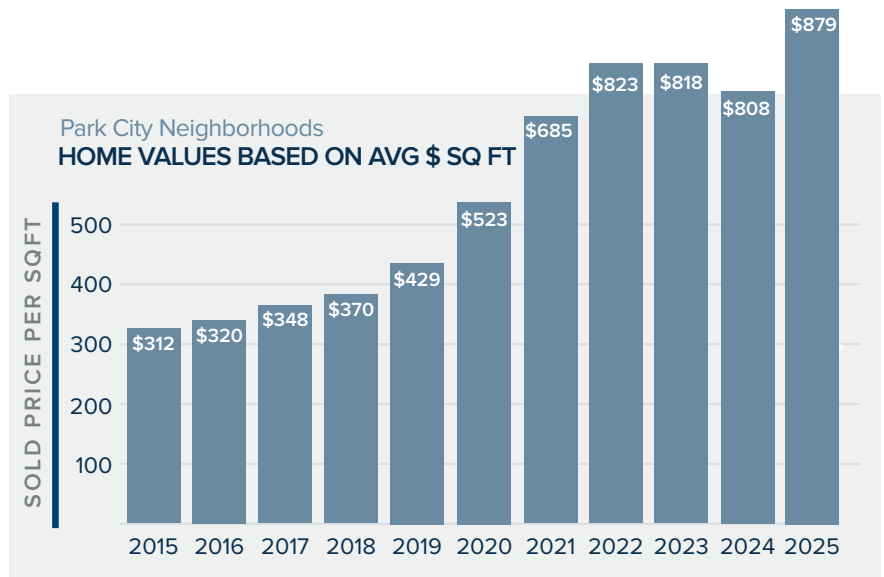

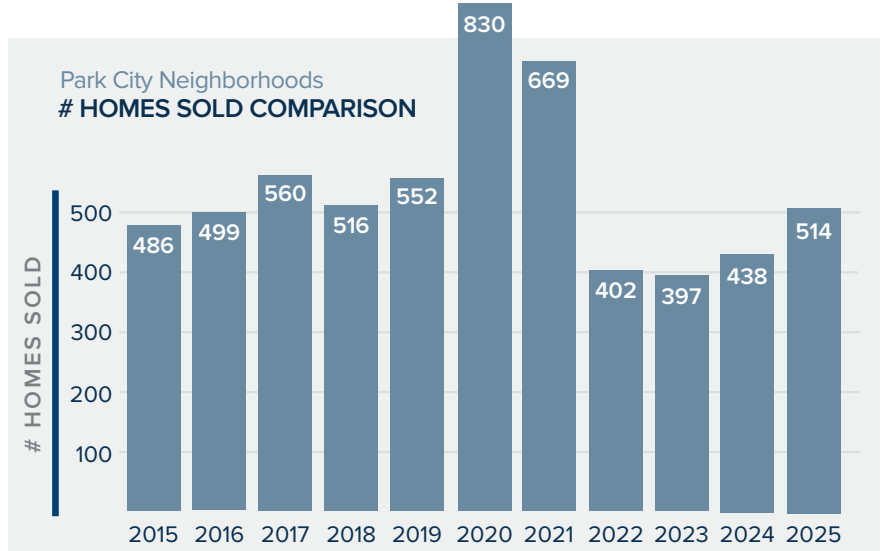

For the first 7 months of 2025 the # of sales per month averaged 36 homes sold, representing an average of more than a 6 month supply. During the last 5 months of the year there was an average of 51 homes sold per month, representing an average of just under a 5 month supply. Since about half of homes sales in Park City are financed, I'll assume that the end of the year uptick in sales correlates with lower interest rates.

SNYDERS MILL UPDATE

Snyders Mill has a great in-town location well positioned between Kimball junction and Canyons Village and walkable to Parleys Park Elementary and Willow Creek Park. Sales in 2025 were less than average with 4 homes sold. Three of the 4 homes that sold were nicely upgraded, bringing the average sold \$\$ per sq ft up to \$856. As of 12/31/25 there were 2 homes listed for sale, representing a 6 month supply. These two homes are dated and likely to be upgraded by the next owners.
